Portfolio of most relevant projects

TechBlog

GitHub: github.com/semantic-void/Projects

- **Project Description:** A platform for programmers to share information, seek answers, and engage with valuable content through QA and liking posts. It provides seamless user Sign-Up, login, and profile management features.
- **Technology:** Java Stack, JSP & Servlets, SQLite (for easy portability), JavaScript, CSS, HTML, Ajax, JQuery, Bootstrap, Material icons, Font Awesome, Apache Tomcat

StoryBooks

GitHub: github.com/semantic-void/MyStoryBooks

Live: storybooks-5spl.onrender.com

- **Project Description:** Storybooks is a dynamic platform for sharing and managing stories. Users can CRUD their own public or private stories, as well as explore public stories shared by others. Additionally, users can view public stories from a specific user. It also provides the option for users to securely log in using Google Auth.
- **Technology:** Node.js, Express.js, Express Handlebars, Google Auth, Passport.js, Atlas (MongoDB cloud)
